GET /trip/wisata/:wisataId - Trip by wisata

GET /trip/:id - Detail trip

PATCH /trip/:id - Update

DELETE /trip/:id - Hapus

Booking Module (Pemesanan)

POST /booking - Buat booking (AUTO totalHarga & kuota deduct)

```
Body: {  
  \"namaUser\": \"John\",  
  \"email\": \"john@example.com\",  
  \"jumlahTiket\": 2,  
  \"tripId\": 1  
}
```

Returns: Booking pending, kuota ==2

Error jika kuota kurang

GET /booking - List booking with trip/wisata relations

PATCH /booking/:id - Update status to 'paid'

```
Body: {\"status\": \"paid\"}
```

Tech Stack

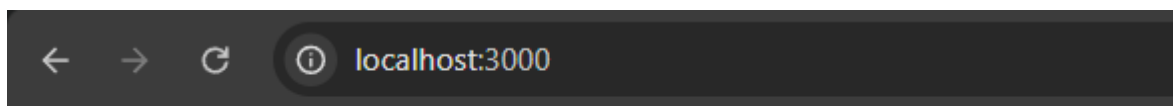

- NestJS framework
- PostgreSQL + TypeORM
- DTO Validation class-validator
- Relations OneToMany (wisata→trip), ManyToOne (trip→booking)

Run

```
cd api
```

```
npm run start:dev
```

```
localhost:3000
```

ExploreNesia API Backend Berhasil! Gunakan /wisata, /trip, /booking.
